

■ UNIFIED SECURITY PLATFORM

Unified security, delivered by AI.

Cylerian is the AI-native operating layer for modern security teams — unifying [SIEM](#), [XDR](#), [CNAPP](#), [Email Security](#), [Exposure Management](#), [Observability](#) and SOC response across endpoints, cloud, identity, networks, applications and email.

01 / Security

Detect & respond.

Managed XDR across endpoint, app, network and cloud, with behavioral analytics and built-in threat hunting.

02 / Observability

See everything.

Cloud SIEM sifts billions of events; sensors, logs and integrations combine into one complete asset picture.

03 / Operations

Automate the run.

AI-native automation remediates incidents end-to-end — SOAR playbooks, ticketing and forensic investigation keep teams aligned.

PLATFORM CAPABILITIES

15 MODULES · ONE CONSOLE

01 Managed XDR Detection and response across endpoints, applications, network and cloud — for the 99%.	02 Cloud SIEM Sift through billions of events in a snap with cloud-native log management.	03 Asset Inventory Combine sensors, logs and marketplace integrations to see the complete environment.
04 Continuous Monitoring Detect vulnerabilities and reduce attack surface in real time across on-prem and cloud.	05 SOAR & Playbooks Track actions, assign owners, and trigger changes through shared, repeatable workflows.	06 Incident Response Conduct forensic investigations at scale; contain intrusions and restore operations fast.
07 Email Security Block phishing, business-email compromise and malicious attachments from inboxes.	08 Identity Threat D&R Detect identity attacks, privilege abuse and account takeovers across directories and SaaS.	09 Cloud Security Posture management and detection across AWS, Azure and GCP workloads, configs and identities.
10 Remote Monitoring & Mgmt Manage and monitor infrastructure remotely with shared terminals for collaboration.	11 DNS Firewall Block command-and-control, malware and risky domains at the resolver before connection.	12 Data Loss Prevention Inspect, classify and stop sensitive data exfiltration across endpoints, email and cloud.
13 Deception Technology Decoy assets surface attacker movement early and feed high-fidelity signals to the SOC.	14 Patch Management Identify, prioritize and deploy OS and third-party patches from a single console.	15 Compliance Tracking Continuously monitor controls against HIPAA, PCI, SOC 2 and ISO 27001 with audit-ready reporting.

■ SPECIFICATIONS & PROOF

Built to deploy in minutes, scale without *limits*.

Cloud-native SaaS, no on-premise infrastructure, hundreds of integrations and a dedicated SOC team. The result: enterprise-grade security delivered as one platform, priced and packaged so any team can run it.

PLATFORM STACK

Endpoints · Apps · Network · Cloud

Sensors · Logs · Integrations

SIEM · XDR · EMAIL · ITDR
· CDR · CSPM · VM

Playbooks · Analytics · Hunting

Cylerian Cloud · Dedicated SOC

FIG. 01 — SINGLE SAAS CONTROL PLANE;
DEPLOY IN MINUTES, NO ON-PREMISE
INFRASTRUCTURE REQUIRED.

PLATFORM SPECIFICATIONS

ARCHITECTURE	Cloud-native SaaS · multi-tenant · zero on-premise infrastructure required
DEPLOYMENT	Up and running in minutes; sensors deploy across endpoint, network and cloud workloads
SCALE	Ingests any volume of telemetry; analytics tuned for billion-event queries
INTEGRATIONS	Marketplace with hundreds of on-prem and cloud data sources, connected in clicks
CUSTOMIZATION	Tailored dashboards, reports, rulesets and ticketing workflows
SOC SUPPORT	Dedicated SOC team; expert-led incident response and threat hunting
COMPLIANCE	Audit trails and reporting templates aligned to common frameworks

WHY TEAMS CHOOSE CYLERIAN

- **Forget the acronyms.** SIEM, XDR, CSPM, SOAR and VM consolidated into a single console.
- **Fast & easy deployment.** No on-premise stack — minutes, not quarters.
- **Built to scale.** Ingest any amount of data without re-architecting your pipeline.
- **Priced for everyone.** Next-gen features available across the maturity curve.
- **Multi-tenant by design.** Supporting MSPs delivering security to clients of all sizes.

"We recommend Cylerian to many of our clients early in the security maturity curve, as well as to more established clients looking to improve their posture with a more holistic solution."

DAVID ARMSTRONG · APHTHORIA
