

■ AI-NATIVE SIEM & XDR

Detect everything. Respond as *one*.

Cylerian unifies cloud-native SIEM and XDR in a single AI-native platform — ingest and search billions of log events in milliseconds, correlate multi-vector attacks across endpoint, cloud, email and network, and remediate in one action. No silos, no maintenance headache.

ENDPOINT · CLOUD · WORKLOADS EDR · CDR

EMAIL · IDENTITY · SAAS ITDR

NETWORK · DNS · LOGS NDR

▼ ▼ ▼

CYLERIAN SIEM + XDR

DETECT → CORRELATE → RESPOND · ONE
CONSOLE

FIG. 01 — TELEMETRY FROM EVERY LAYER STREAMS INTO ONE CLOUD-NATIVE ANALYTICS ENGINE; AI CORRELATES MULTI-VECTOR ATTACKS AND TRIGGERS REMEDIATION ACROSS THE STACK.

PLATFORM CAPABILITIES

4 MODULES · ONE CONSOLE

01 SIEM

Cloud-Native SIEM Analytics

A modern SIEM built for speed and scale. Ingest, search and visualize billions of log events with zero infrastructure to manage.

- + UEBA & ML detection of unknown, low-and-slow attacks
- + Out-of-the-box correlation rules & long-term threat hunting

02 XDR

Unified Detection Beyond the Endpoint

Unify telemetry from endpoint, cloud, email and network to catch complex, multi-vector attacks a single tool would miss.

- + Cross-stack correlation — email → endpoint → network
- + Threat-chain analytics & risk-based alert prioritization

03 SOAR

Unified, Automated Response

AI-native remediation acts across your entire stack from one console the moment a detection fires.

- + Block IP at the firewall & kill the process in one action
- + Owner-assigned playbooks · auto-suspend accounts

04 COMPLY

Compliance & Reporting

Audit-ready out of the box, with live dashboards mapped to the frameworks you report against.

- + Pre-built GDPR, PCI-DSS, HIPAA & SOC 2 dashboards
- + Custom dashboards & correlation logic

ARCHITECTURE

Cloud-native SaaS · one unified agent · zero infrastructure

SCALE & SEARCH

Billions of events · millisecond hot & historical search

DETECTION

UEBA · ML · threat-chain analytics → MITRE ATT&CK

RESPONSE & SOC

AI-native SOAR · managed detection & response

BY THE NUMBERS

WHY TEAMS SWITCH

~50%

Lower cost vs. a multi-vendor SOC stack

Minutes

To deploy — no on-prem infrastructure

Billions

Events ingested & searched in ms

100s

Connectors across cloud & on-prem
